Enabling Middle Mile Broadband Infrastructure Program

GenXC
Dominicana

Focused on developing middle-mile broadband infrastructure, this program funds projects that strengthen the core backbone of internet networks, making it easier and more affordable to bring high-speed internet to unserved and underserved areas.

GenXC Group is dedicated to supporting the Enabling Middle Mile Broadband Infrastructure Program by bringing our expertise in **network planning**, **engineering**, and **deployment** to each project. We collaborate with federal, state, and local agencies to construct resilient middle-mile networks, ensuring high-capacity, scalable solutions that facilitate cost-effective last-mile connectivity for high-speed internet access in underserved regions.

OUR SERVICES AND COMPLIANCE

Network Design & Planning

Engineering & Construction

Technical Support & Maintenance

✅ Strict adherence to Occupational Safety and Health Administration (**OSHA**) guidelines, creating safe working environments for all team members and stakeholders.

✅ Compliance with Federal Information Security Management Act (**FISMA**) to secure data privacy and network security throughout all middle-mile infrastructure.

✅ Meeting **federal guideline**s on community engagement to align projects with local needs and ensure that infrastructure benefits are accessible to all.

With extensive experience in broadband network infrastructure, GenXC Group is an ideal partner for Enabling Middle Mile Program projects. We provide comprehensive, high-quality services that prioritize sustainability, community impact, and regulatory compliance.
